Description

httplib2shim ===== [Build Status] [Coverage Status] [PyPI Version] httplib2shim`is a wrapper over httplib2`that uses urllib3`to perform HTTP requests. This library is intended to help existing legacy libraries (and their users) to migrate away from httplib2`. It is not intended to be a general purpose replacement for httplib2`. It does not support every feature and edge case for httplib2`, although contributions are welcome in order to help us cover these cases. Presently, httplib2shim`passes the test suite for httplib2`. A few non-applicable tests were disabled, and it's very possible that the tests do not account for behavior that is depended on by clients. Usage ---

It's recommended to install urllib3[secure]`before installing httplib2shim`. .. code:: bash pip install urllib3[secure] httplib2shim Usage is straightforward. You can substitute httplib2shim.Http` anywhere httplib2.Http`is used: .. code:: python import httplib2shim from oauth2client.client import GoogleCredentials credentials = GoogleCredentials.get_application_default() http = httplib2shim.Http() credentials.authorize(http) # http is now authorized with OAuth2 credentials and uses urllib3 under the covers. Alternatively, if you do not control the construction of the Http`object, you can use httplib2shim.patch()`to monkey-patch the httplib2.Http`class to point to httplib2shim.Http(): .. code:: python import httplib2shim httplib2shim.patch() from googleapiclient.discovery import build from oauth2client.client import GoogleCredentials credentials = GoogleCredentials.get_application_default() # build constructs its own httplib2.Http instance. service = build('compute', 'v1', credentials=credentials) # service.http is now a httplib2shim.Http object. Unsupported Features ----- * Arguments to the Http` constructor will be accepted, but may not make a difference. For instance, `ca_certs` will have no effect. Instead, pass a urllib3.Pool` instance http = httplib2shim.Http(pool=my_pool). * Http.add_certificate`is a no-op and will warn. \* Probably others, pull requests are welcome to complete the functionality. Contributing changes ----- - See CONTRIBUTING.md` Licensing ----- - MIT - See LICENSE` .. _LICENSE:
